STRUCTURAL PRESERVATION

ESTOL - SILO VARNISH

APPLICATION

ESTOL-Silo Varnish is a bitumen, insulating and protective coating that is used in structural sealing.

Concrete and plaster are suitable surfaces.

PROPERTIES

ESTOL-Silo Varnish is a black, cold workable bitumen insulating coating.

ESTOL-Silo Varnish:

- contains solvents
- is tar-free
- is spreadable when cold
- is suitable for concrete, plaster and roofing membranes
- is suitable for drinking water containers

INSTALLATION

ESTOL-Silo Varnish is applied to concrete or plaster surfaces using spraying or painting methods. The surface must be clean, dry and free of loose particles.

We recommend multiple application steps.

Ensure that the last coating is completely dry.

When using a spraying method the airless method should be used.

Usage

- 1 top coat 200 - 300 g/m²
- 2 top coats 400 - 500 g/m²
- 3 top coats 500 - 600 g/m²

SUPPLY/STORAGE

ESTOL-Silo Varnish is available in 5, 10 and 30 litre tin containers. 56, 45 and/or 16 containers are packed onto one pallet.

ESTOL-Silo Varnish can be stored up to one year in its unopened original container.

What our company is all about

Many streets and building are deteriorating under the effects of climate and traffic, which can initiate wear-out and lead to destruction over the course of time. This process can be countered with the right repair and renovation measures, which enhance structural integrity in a way that satisfies safety and order regulations. Süddeutsche Teerindustrie GmbH & Co. KG has been working on technologies to perfect street renovation for over 100 years. Based on

countless developments that have been tested through and through, upcoming construction projects will be handled reliably with a high level of competence. Clients from all over the Federal Republic of Germany, as well as from neighbouring European countries, have confidence in our experienced employees and excellent products. STM stands for fair partnership with maximum performance for our clients.
